F. Jaca Street Inayawan Cebu City

SUMMARY

A motivated and detail-oriented recent graduate of Bachelor of Science in Computer Engineering eager to begin a professional career in a dynamic organization where technical knowledge, creativity, and dedication can contribute to organizational success, and continuous personal and professional growth.

PORTFOLIO

Smart Security Watch with AI-Driven Intrusion Detection and Mobile Phone Protection 2026
Developer

- Developed a smart wearable security system integrated with behavioral AI to continuously authenticate users based on touch dynamics and interaction patterns.
- Utilized stabilized BLE RSSI tracking to establish a secure proximity threshold and detect potential phone intrusions.
- Built the hardware architecture and interactive UI to seamlessly communicate threat alerts between the micro controller and the mobile application.

Board Mate Connect 2026

Full-stack Developer

- Developed a mobile application that centralizes communication for boarding house owners and tenants using Kotlin.
- Built the app within Android Studio and integrated Firebase for real-time updates on announcements and chats.
- Designed to enhance communication and information sharing within the boarding community.

Library Sorting System 2025

Front-End Developer

- Contributed as a Front-End Developer in building a web-based library system that aids users in locating books.
- Developed the application using C#, Razor, and MySQL for effective database management.
- Focused on improving usability and layout for book search and categorization features.

Boarder's Hub 2024

Front-End Lead Developer

- Led the development of a web platform to assist users in finding available boarding houses or apartments.
- Created interactive interfaces using React, while integrating listings with Firebase for real-time data management.
- Enhanced user experience by providing features for browsing rooms, viewing details, and exploring housing options conveniently.

Cinema Ticket Booking System 2023

Developer

- Developed a cinema ticket booking system using C# in Visual Studio, integrating Microsoft Access for database management.
- Implemented a user-friendly interface that allows users to select movies, reserve seats, and manage ticket bookings.
- Strengthened database integration knowledge and desktop application development skills through this project.

Productivity Tracker 2023

Front-End Developer

- Engineered a productivity tracking system enabling employers to monitor assigned tasks and employee time records.
- Designed the user interface utilizing React (Vite) and integrated it with a MongoDB database for real-time data storage.
- Contributed to create an organized dashboard for managing and monitoring work progress.

EDUCATION

Bachelor of Science in Computer Engineering

Cebu Institute of Technology - University
2021- 2026

Senior High School

University Of Cebu - Main Campus
2018- 2020

Junior High School

University Of Cebu - Main Campus
2014- 2018

SKILLS

- Java
- C++
- C#
- Firebase
- Kotlin
- Android studio
- AI tools
- AI automation
- React
- CSS
- HTML
- Team Collaboration
- Critical Thinking
- Effective Communication
- Adaptability
- Flexibility

CERTIFICATIONS

TESDA AI Workflow Automation - 2026

- Completed an intensive one-week training program focused on designing, building, and deploying automated AI workflows utilizing Activepieces.

MCIAA 240hrs OJT Completion - 2025

- Successfully completed 240 hours of practical On-the-Job Training (OJT) within the ECD Department, applying technical knowledge and gaining hands-on industry experience in a real-world environment.

Computer Systems Servicing NCII - 2021

- Certified in core IT infrastructure tasks, demonstrating proficiency in computer hardware assembly, operating system installation, network configuration, and server setup.
